OBJECTIVE

A web application developer with hands-on full-stack development experience, specializing in backend development. Seeking to learn new skills to increase my professional abilities and contribute them effectively in a work environment with service and determination.

PROJECTS

SerV-IT Manager

Jan 2025 – Present

- **Role:** Full-stack Developer (Backend Focused)
- **Technologies Used:** Java, Spring Boot, JavaScript, HTML, CSS, ReactJS + Vite
- **Description:** Developed a web-based IT repair management system that automates repair tracking, enhances customer communication, and improves service efficiency for IT service providers.

WUE (Wild-Up Events)

Oct 2024 – Dec 2024

- **Role:** Full-stack Developer, Project Lead
- **Technologies Used:** Java, Spring Boot, HTML, CSS, JavaScript, ReactJS + Vite
- **Description:** Developed a web platform for managing campus-based events with ease and efficiency. With easy-to-use features for event management, bookings, payments, feedback, and analytics.

WAS (Wildcats Academic Sync)

Mar 2024 – May 2024

- **Role:** Full-stack Developer, Project Lead
- **Technologies Used:** Python, Django, HTML, CSS, JavaScript
- **Description:** Developed a user-friendly web application that helps students organize their academic responsibilities effortlessly. With a focus on simplicity, students can easily add, view, update, and delete information related to their studies.
